Election/Restrictions

Newly submitted claims 7-13 directed to an invention that is independent or distinct from the invention originally claimed for the following reasons:

The product of claims 1-6 can be used for another process. For example, carbon nanohorns can be used as electrodes for fuel cells. Further, there is an undue burden of search. The search for the method of adsorption through a carbon nanohorn is open to more than a search for a nanohorn product. Finally, the search for the process would be in class 210 and subclass 110. The search for the product was in class 423 and subclass 445B.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 7-13 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

The amendment filed on 7/14/2006 canceling all claims drawn to the elected invention and presenting only claims drawn to a non-elected invention is non-responsive (MPEP § 821.03). The remaining claims are not readable on the elected invention because the product carbon nanohorns can be used in another process as explained above.

Since the above-mentioned amendment appears to be a *bona fide* attempt to reply, applicant is given a TIME PERIOD of ONE (1) MONTH or THIRTY (30) DAYS, whichever is longer, from the mailing date of this notice within which to supply the omission or correction in order to avoid abandonment. EXTENSIONS OF THIS TIME PERIOD UNDER 37 CFR 1.136(a) ARE AVAILABLE.

In response to the remarks about the intended use of the product claims, these were merely intended use of the product and did not limit the claims. Therefore, the intended use was not treated in the original office action. The restriction is proper because the product can be used in a different process (see above) and there is a burden of search.
